

# Denver® 5-Slot and 2-Slot Panels

Denver® 5-Slot Panel DV-DIN-5PAN

Denver® 2-Slot Panel DV-DIN-2PAN

The Denver® 5-Slot and 2-Slot Panels house all centralized components of a Denver® Panelized Lighting System. Both panels include a variety of creative features designed to make installation and wiring of the system quick and convenient.

- Surface mount or flush mount between a standard 16 inch on center stud bay
- Generous space at the top and bottom of the panel for electrical wiring
- Swivel divider at the top and bottom effectively separates line-voltage and low-voltage wiring, providing the maximum amount of space possible for each type of wire as needed
- Numerous knock-outs at the top, bottom and sides of the panel
- Several zip-tie points on the left and right of the panel for wire management
- DIN rail mounting for modules allows modules to easily snap on and off—no screws required
- Terminal block mounting points provide quick and easy installation of terminal blocks (sold separately)
- All modules protrude through the front cover for access to channel status LEDs and easy control of individual loads without having to remove the cover (optional security cover available to prevent access to module buttons and LEDs if desired)
